

Scott McNeely
President
Entomologist

Frank Fowler
Vice President
Biologist

McNeely Pest Control was founded in Winston-Salem, NC by entomologist Scott McNeely in 1999. Scott is a second-generation pest control operator. The McNeely family has been serving the pest control needs of the Piedmont Triad since 1944.

Why Choose Us?

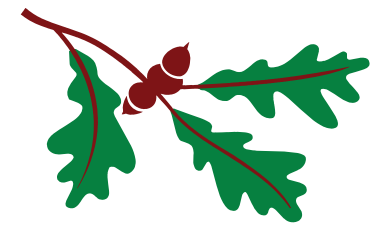

Expertise: Our decades of experience and backgrounds in biology and entomology means there are few pests we haven't seen and eliminated.

Investment: To stay on the leading edge, we are constantly updating our skills and equipment to reflect the latest advances in the pest control industry.

Training: Led by an entomologist and biologist means that our employee education and training is rooted in science and constantly evolving.

Customer Service: We work fairly, honestly and diligently to provide our customers with the best possible services that we are capable of providing. We want to treat our customers the way we want to be treated and hold ourselves to the highest standards.

Value: From one-time treatments to our residential pest control plans and commercial pest control plans, McNeely Pest Control maximizes your budget with custom strategies suited to your specific needs.

- Rodent Solutions
- Wildlife Solutions
- Green Pest Management
- Bird Exclusions and Netting
- Wood-Destroying Pest Management
- Fumigation Services
- Pest Proofing/Exclusion
- Real Estate Inspections

Wood Destroying Pest Management

The Piedmont Triad must deal with several types of wood destroying insects such as termites, carpenter ants, powder post beetles, carpenter bees and wood boring beetles. These insects can destroy the integrity of structures and cause thousands of dollars of damage. With our team of experienced technicians and our background in entomology, McNeely Pest Control will find and rid your home or business of wood-destroying insects.

Bed Bug (Thermal Remediation Technology)

Bed bug free: Five hours. 120 degrees. Guaranteed.

For efficient elimination of these persistent pests, we use Temp-Air Thermal Remediation technology. While conventional bed bug extermination methods require extensive chemical application and multiple treatments, heat remediation produces immediate results in one day.

Visit our website to learn more about our superior Heat Treatment vs conventional chemical treatments.

Wildlife Removal Services

We have a number of North Carolina Animal Damage Control agents on staff to safely and humanely remove bats, squirrels, raccoons, coyotes, snakes, beavers, geese and any other urban wildlife concern. Our wildlife professionals specialize in habitat modification, humane wildlife removal, exclusion, inspections for presence of wildlife and are able to recommend preventative measures to modify conditions that are conducive to wildlife invasions.

T•A•P Insulation

T•A•P stands for thermal, acoustical, pest control, and is the patented result of the combination of high quality insulation and a pesticide.

T•A•P insulation stops pests, saves energy & money, absorbs sound, is fire resistant, organic, eco friendly and will last the life of the structure.

T•A•P insulation is great for new structures or as an addition to current homes or commercial buildings.
